Richard S. Hill, Chairman and Chief Executive Officer said, "There continues to be strong demand for personal computers from both the consumer and corporate sectors. This bodes well for continued capacity expansion in the semiconductor industry. We are very pleased with our strong operating performance this quarter and believe we can continue to improve on all key financial metrics." Hill also added, "Looking forward, we expect our business prospects to continue to be good. We are executing on all major fronts, with a leading edge product portfolio and a solid financial model that we believe will help us to deliver exceptional operating results. Our employees have done a great job in weathering the financial crisis that gripped the globe and positioned Novellus to emerge a much stronger company."

Management uses non-GAAP measures to evaluate operating performance. The presentation of net income (loss) excluding certain charges and benefits and the discussion of revenue on a shipments basis are not in accordance with GAAP and may differ from non-GAAP methods of accounting and reporting used by other companies. We present net income (loss) on a pro forma basis, excluding certain charges and benefits, because we believe this helps both management and investors to assess the operating performance of our business by comparing it to prior periods on a more consistent basis. A reconciliation between our GAAP and non-GAAP results is provided below. Non-GAAP numbers are merely a supplement to, and not a replacement for, GAAP financial measures.
