"In an extraordinarily difficult supply environment, Lam reported March quarter results within guided ranges," said Tim Archer, Lam Research's President and Chief Executive Officer. "We are focused on resolving our supply issues as quickly as possible to support strong customer demand. We remain confident in the secular drivers of wafer fabrication equipment investment as well as Lam's leadership position and expect to return to solid growth as industry constraints ease."

Balance Sheet and Cash Flow Results

Cash and cash equivalents, short-term investments, and restricted cash and investments balances decreased to \$4.6 billion at the end of the March 2022 quarter compared to \$5.6 billion at the end of the December 2021 quarter. This decrease was primarily the result of \$1.3 billion of share repurchases, including net share settlement of employee stock-based compensation; \$211 million of dividends paid to stockholders; and \$145 million of capital expenditures, partially offset by \$758 million of cash generated from operating activities.

Deferred revenue at the end of the March 2022 quarter increased to \$2,069 million compared to \$1,458 million as of the end of the December 2021 quarter. Lam's deferred revenue balance does not include shipments to customers in Japan, to whom title does not transfer until customer acceptances. Shipments to customers in Japan are classified as inventory at cost until the time of acceptance. The estimated future revenue from shipments to customers in Japan was approximately \$263 million as of March 27, 2022 and \$328 million as of December 26, 2021.
